HERO

AI that eliminates work.
Software that runs your operations.

AI Powered Business Systems and Custom Software for Mid Market Companies in India. We build the Automation, CRMs, and Workflows that cut manual work by 50%.

' Fixed price quote ' Weekly delivery ' Full code ownership

KEY STATISTICS

55%	3–5×	100%	90 days
Manual Work Reduced	Operational Efficiency	Code Ownership	ROI Timeline

SERVICES OVERVIEW

One Goal: Systems That Run Without You

01 AI & Business Automation

WhatsApp flows, email sequences, AI support agents, and workflow automation.

- › WhatsApp lead qualification & instant booking
- › Behaviour-triggered email sequences
- › AI agents for tier-1 customer support

& **30–60% reduction in manual operations within 90 days**

02 Custom Software & Systems

AI-powered CRMs, real-time dashboards, and internal tools built for your workflow.

- › AI-powered CRMs for real team adoption
- › Real-time dashboards replacing fragmented tools
- › Centralised data for better decisions

© 2024 Straveda Tech · Pune, India · hello@stravedatech.com

03 AI Strategy & Integration

Deploy GPT-class models, custom LLMs, and RAG systems into your existing stack.

- GPT-class model deployment & advanced AI APIs
- Custom LLM integration for business workflows
- RAG systems using your private, secure data

04 Web Development & 3D Experiences

High-performance websites, 3D experiences, and conversion-focused landing pages.

- Next.js — sub-second loads, global edge deployment
- 3D interactive experiences for brand differentiation
- A/B testing & analytics built into the core

& 2–4× improvement in conversion rates vs template sites

WHY STRAVEDA

Enterprise-Grade Execution, Without the Complexity

!’ Weekly Shipping:
One-week sprints. Builds every Friday, approve Monday, ship Tuesday. No black-box discovery phases.

!’ Automation First:
Before we build feature one, we audit what can be removed, integrated, or automated. We prune scope then automate what's left.

!’ You Own Everything:
Full code ownership. Complete documentation. Zero vendor lock-in. If we disappear tomorrow, you can run every system we built.

!’ Priced for ROI in 60 Days:
Every proposal includes projected time savings, cost reduction, or revenue lift. If it doesn't pay back in one quarter, we don't recommend building it.

!’ One Team, End-to-End:
Strategy, AI engineering, design, and deployment under one roof. One Slack channel. One point of accountability.

!’ Senior Execution:
We cap engagements each quarter so you get senior attention on every build.

PROCESS

From Strategy Call to Live System

01 Discovery

30-min strategy call. Analyse workflows, identify bottlenecks, define high-impact automation opportunities. You leave with a clear action plan — not a sales pitch.

02 Architecture

Design your custom solution, define the tech stack, scope the build. Fixed price proposal within 24 hours — no hidden costs.

03 Build

Develop in weekly sprints with full visibility. Review progress, give feedback, stay in control.

04 Automate

Wire in the automation layer — triggers, workflows, AI agents. System runs without human intervention before handover.

05 Scale

Full handover with documentation. Your team owns it. Retainer support available but not required.

PRICING

Flexible Engagement Models

All engagements include full source code ownership and zero vendor lock-in. Fixed price quote after a 30-min discovery call.

Focused Automation Builds

From ₹5L

Timeline: 2–3 weeks

- One custom automation workflow
- Seamless tool integration
- Documentation & handover

Custom Software & AI Systems

₹15L– ₹50L

Timeline: Based on scope

- End-to-end custom development
- AI workflow integration
- Scalable, ownership-ready code

Ongoing Optimization & Scale

Retainer

Timeline: Monthly

- Performance monitoring
- Feature enhancements
- Continuous optimisation

Services

Enterprise Software & AI Automation Services

SERVICE 01

AI & Business Automation

Automates repetitive manual operations that drain your team's time and budget.

- WhatsApp Automation: AI-powered lead qualification & instant booking — runs 24/7 without human intervention.
- Email Sequences: Behaviour-triggered campaigns that run without touching your CRM.
- AI Support Agent: Tier-1 queries handled by AI; complex issues auto-escalate to your team.
- Workflow Automation: 30–60% reduction in manual operations within the first 90 days.

SERVICE 02

Custom Software & Systems

Purpose-built tools that replace off-the-shelf SaaS with systems your team actually adopts.

- AI-Powered CRMs: Built around your specific sales process — not a generic template.
- Operational Dashboards: Real-time visibility into your core metrics. No more spreadsheets.
- Customer Portals: Reduce support volume with intelligent self-service.
- Internal Tools: Replace fragmented SaaS subscriptions with one integrated system.

SERVICE 03

AI Strategy & Integration

Deploy production-grade AI into your existing stack — not demos, not experiments.

- AI Architecture: Phased roadmap to deploy AI where it creates real, measurable ROI.
- LLM Fine-Tuning: Models trained on your specific business context and terminology.
- RAG Systems: AI that answers questions using your private, secure data.
- API Integration: Seamlessly connect GPT-4o, Claude, and other models into your workflow.

SERVICE 04

Web Development & 3D Experiences

High-performance websites and immersive experiences that convert visitors into clients.

- Next.js Performance: Sub-second loads and global edge deployment. SEO-ready from day one.
- 3D & Interactive: Make your brand unforgettable with immersive builds that stand out.
- Conversion Funnels: A/B testing and analytics built into the core — not bolted on.
- Result: 2–4× improvement in conversion rates vs template-based sites.

TECH STACK

Mastered Technologies

Frontend: Next.js, React, TypeScript, Tailwind CSS
AI & Automation: OpenAI GPT-4o, Claude API, LangChain, Vector DBs
Infrastructure: AWS, Google Cloud, Docker, CI/CD, Security
Data & Backend: PostgreSQL, Redis, Node.js, REST/GraphQL
Automation Tools: n8n, WhatsApp API, Zapier

About Us

We get it. Because we've lived it.

OUR STORY

Two Paths. One Choice.

Every growing company eventually hits the same wall. Too many tools. Spreadsheets that don't sync. Your best people spending Friday afternoons doing work that shouldn't exist. You don't need another vendor — you need someone who actually understands the problem. We do.

We've built companies. We've felt the frustration of paying for five tools when you really need one well-designed system that your team understands. That's why Straveda is different — building AI-powered systems that replace chaos with structure.

THE TRANSFORMATION

The Old Way (Chaos)	The Straveda Way (Structure)
' Paying for 5 tools. None of them talk.	' One platform, built for how you actually work.
' Fridays spent on reports that should write themselves.	' Reports run overnight. Fridays are yours again.
' A decision needs 2 days just to get the data.	' Every decision backed by live data instantly.
' Implementation started 6 months ago. Still setting it up.	' You're live in 5 weeks. Paying back in 90 days.
' Your best hire is doing data entry.	' Your best hire is doing their best work.

OPERATING PRINCIPLES

How We Work

Automation First
Before we build feature one, we ask: "What can we eliminate?" We prune scope — then automate what's left.

You Own Everything
Full code ownership. Complete documentation. Zero vendor lock-in. If we disappear, your team runs the system.

Speed Over Perfection
Shipping fast beats planning perfectly. Weekly sprints. Friday builds. Working software by week 4.

Transparency
No black boxes. We document as we build. You know the "why" behind every decision.

Priced for ROI
If a project doesn't pay for itself in 90 days, we don't build it.

CLIENT STORIES

> We went from 200 leads/month to 1,200 in the same timeframe. Our team went from drowning to thriving.

D2C Fashion Brand, Mumbai
Operations Director

6× lead throughput

> Our CRM actually works the way we work. Sales velocity is up 3× and team adoption was instant — 95% vs 45% on Salesforce.

SaaS Startup, Bangalore
Founder

3× sales velocity

> We were paying for six different tools. Straveda consolidated everything into one integrated platform. ROI in the first quarter.

E-Commerce, Delhi NCR
CEO

50% cost reduction

> We reclaimed 90 hours/month of team capacity from one automation project. That's two full-time people worth of work eliminated.

Mid-Market Company, India
Operations Director

90 hrs/month reclaimed

> The WhatsApp automation handles 80% of our lead flow. Response time dropped from 12 hours to under 5 minutes.

D2C Brand, India
Head of Growth

80% automation rate

© 2024 Straveda Tech · Pune, India · hello@stravedatech.com

> Document processing went from 5 minutes to 30 seconds per document. Claim approvals are 3× faster.

Insurance Broker, Mumbai
Operations Lead

10× faster processing

> Fixed price quote, clear timeline, weekly progress updates. No surprises, no scope creep. Live in 5 weeks.

Professional Services, Pune
CEO

On-time delivery

> I was skeptical about the 4–6 week timeline. They shipped the first working system in week 4. Every Friday, a demo. Every Monday, our feedback.

B2B SaaS, India
Founder

Week-4 delivery

Careers

Build systems that eliminate busywork for mid-market teams.

OPEN ROLES

Full Stack Engineer

Full Time · Remote / Nashik

Skills: Next.js, TypeScript, Node.js

Build scalable web applications and internal tools. Own features end-to-end, from API design to pixel-perfect UI.

AI / ML Engineer

Full Time · Remote / Nashik

Skills: Python, LLMs, LangChain

Design and deploy AI-powered workflows and automation pipelines. Work with cutting-edge language models in production.

Automation Specialist

Full Time · Remote

Skills: n8n, WhatsApp API, Zapier

Architect end-to-end automation workflows that eliminate manual operations for growing businesses.

Product Designer

Contract · Remote

Skills: Figma, UX Research, Design Systems

Translate complex business requirements into clean, intuitive interfaces. Push back on anything that gets in the user's way.

HIRING PROCESS

Total: 1–2 weeks from application to offer

STAGE 1 — **Initial Conversation (15 min)**

Within 3 days of applying. Phone call — cultural fit, communication, interest.

STAGE 2 — **Portfolio / Technical Review (30 min)**

3–5 days after Stage 1. Share portfolio, GitHub repos, or past projects on Zoom.

© 2024 Straveda Tech · Pune, India · hello@stravedatech.com

STAGE 3 **Take Home Project (Optional)**
Real-world problem from our work. No weird algorithmic puzzles.

STAGE 4 **Team Interview (20 min)**
Meet 2–3 team members. Technical deep-dive on your take-home.

STAGE 5 **Offer (~1 week)**
Call with CEO or hiring director. Discuss comp, benefits, start date.
